

Leadership in Energy and Environmental Design (LEED) Survey Consulting Services

Uncover insights and turn them into actions

By asking the right questions and examining the answers, our experienced research team can uncover the information you need to create sustainable solutions that work.

When it comes to survey design and analysis, SustainMobility has expertise you can rely on to assess your transportation and LEED EB: O&M requirements. We provide easy-to-understand data summaries, detailed protocol and methodology reports.

As your partner, we will perform a comprehensive set of tasks including, but not limited to:

- › Designing customized digital and paper surveys
- › Managing data collection and analysis
- › Performing data cleaning and quality control by
 - › ensuring all respondents meet screening criteria
 - › ensuring all surveys are complete and accurate
 - › reviewing responses and checking for duplicates
 - › auditing all manually tabulated data
- › Providing methodology and protocol reports
- › Providing a comprehensive summary of the results
- › Developing formal presentation materials
- › Providing marketing material and on-site support
